

DSA LAB Exam

1. Write a Java program to

a. Perform insertion sort

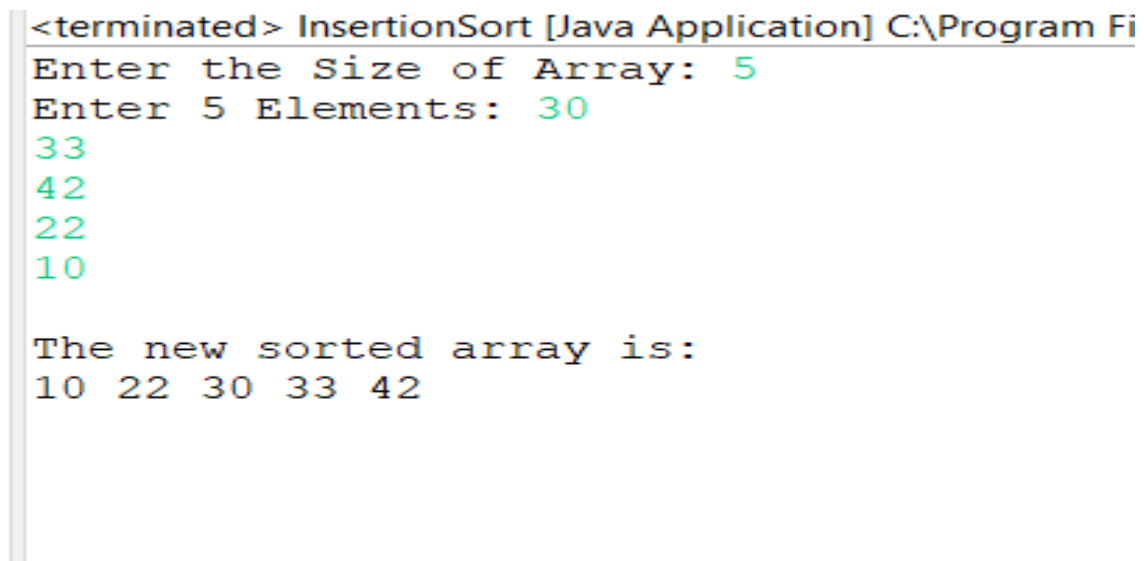

IDE

Window Help

```
1 package com.main;
2 import java.util.Scanner;
3
4 public class InsertionSort {
5
6     public static void main(String[] args)
7     {
8         int n, i, j, element;
9         Scanner scan = new Scanner(System.in);
10
11         System.out.print("Enter the Size of Array: ");
12         n = scan.nextInt();
13         int[] arr = new int[n];
14         System.out.print("Enter " + n + " Elements: ");
15         for(i=0; i<n; i++)
16             arr[i] = scan.nextInt();
17
18         for(i=1; i<n; i++)
19         {
20             element = arr[i];
21
22             for(j=(i-1); j>=0 && arr[j]>element; j--)
23                 arr[j+1] = arr[j];
24
25             arr[j+1] = element;
26         }
27
28         System.out.println("\nThe new sorted array is: ");
29         for(i=0; i<n; i++)
30             System.out.print(arr[i]+ " ");
31     }
32 }
33
```

Output:

```
<terminated> InsertionSort [Java Application] C:\Program Fi
Enter the Size of Array: 5
Enter 5 Elements: 30
33
42
22
10

The new sorted array is:
10 22 30 33 42
```

b. Implement queue using array

ipse IDE

```

Window Help
InsertionSort.java dsaQueueArray.java QueueArrMain.java
1 package com.main;
2 import java.util.*;
3
4
5     public class dsaQueueArray {
6
7         int[] queueArray;
8         int front, rear, size;
9
10        public dsaQueueArray(int size) {
11            this.size = size;
12            queueArray = new int[size];
13            front = -1;
14            rear = -1;
15        }
16
17        public boolean isFull() {
18            return (rear == size - 1);
19        }
20
21        public boolean isEmpty() {
22            return (front == -1 || front > rear);
23        }
24
25        public void enqueue(int item) {
26            if (isFull()) {
27                System.out.println("Queue is full!");
28                return;
29            }
30            queueArray[++rear] = item;
31            if (front == -1) {
32                front = 0;
33            }
34        }
35
36
37
38
39
40
41
42
43
44        void display()
45        {
46            int i;
47            if (isEmpty()) {
48                System.out.println("Empty Queue");
49            }
50            else {
51                // display element of the queue
52                System.out.println("Items -> ");
53                for (i = front; i <= rear; i++)
54                    System.out.print(queueArray[i] + " ");
55                System.out.println(" ");
56            }
57        }
58
59    }
60

```

```
62 public static void main(String[] args) {  
63     dsaQueueArray q = new dsaQueueArray(5);  
64     q.enqueue(11);  
65     q.enqueue(32);  
66     q.enqueue(43);  
67     q.enqueue(45);  
68     q.enqueue(57);  
69     q.display();  
70     System.out.println("item deleted from queue=" + q.dequeue());  
71     System.out.println("item deleted from queue=" + q.dequeue());  
72     q.display();  
73 }  
74 }  
75
```

Output:

```
<terminated> dsaQueueArray [Java Application] C:\Progra  
Items ->  
11 32 43 45 57  
item deleted from queue=11  
item deleted from queue=32  
Items ->  
43 45 57
```
